Applied Logic and Computation Laboratory, NTU EE, Taipei, Taiwan

Research Assistant (Advisor: Dr. Jie-Hong R. Jiang)

- Researched on Threshold Logic Synthesis and Optimization for modern circuit design.
- Proposed threshold logic network interconnect optimization algorithm using an efficient threshold logic function representation data structure; up to 10% interconnection and 14% weight/threshold value reduction achieved over highly optimized threshold logic networks.

02/2017 - 01/2019

Electronic Design Automation Laboratory, NTU EE, Taipei, Taiwan

Research Assistant (Advisor: Dr. Yao-Wen Chang)

- Proposed an algorithm on **Obstacle-Aware On-Track Bus Routing** based on directed acyclic graph; outperformed the winning teams in the 2018 ICCAD Contest, where the top-3 routers result in 145%, 158%, 420% higher costs than ours.
- Designed an algorithm on Initial Detailed Routing; in particular 23% reduction of routing cost was obtained compared with the first place router in the 2018 ISPD Contest.
